May 1, 2020

The Trinity Rural Water supply Corporation TX2280011 has violated the monitoring and reporting requirements set by the Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems that treat Surface Water and/or Ground Water under the direct influence of Surface Water are required to submit monthly operating reports with operational data of the treatment, disinfection and quality of the water provided to their customers.

This/These violations occurred in the monitoring period(s) 02/01/2019-02/28/2019

Results of regular monitoring are an indicator of whether or not our drinking water is safe. We did not complete all monitoring and/or reporting for surface water constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to address the issue: **We have replaced the faulty computer and hard drive that went down causing us not to be able to report on time.**

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e. people in apartments, nursing homes, schools, and businesses).
