September 9, 2021

The Trinity Rural WSC 1 water system PWS ID 2280011 has violated the monitoring/reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This/These violations occurred in the monitoring period(s) **01/01/2020-03/31/2020**

We are taking the following actions to address this issue: This was resolved in April of 2020 as samples were taken just turned in a couple days late.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place of distributing copies by hand or mail.

If you have any questions regarding this matter you may contact Jay Savanich or Jenifer Thomas at Trinity Rural Water 936-594-2192.

Jay Savanich, General Manager
